

D8 DISCOVER Plus: Uncompromised Power, Unmatched Accuracy, Unparalleled Efficiency

Jon Giencke, Brian Jones, Nathan Henderson, Benjamin Krueger
Bruker AXS – 5465 East Cheryl Pkwy – Madison, WI - US

The D8 DISCOVER Plus equipped with the ATLAS goniometer sets a new benchmark for laboratory X-ray diffraction systems. The vertical geometry enables ease-of-use from horizontal sample mounting while the strengthened ATLAS goniometer ensures best performance in both angular and beam positioning accuracy. Comprehensive software integration and compatibility with a wide range of innovative technologies, including the TXS-HE high efficiency rotating anode source, TRIO multi beampath optic and next generation EIGER2 R 500K HPC detector, allows construction of comprehensive analytical X-ray diffraction solutions.

In this presentation details of the D8 DISCOVER Plus will be discussed including results from a wide range of applications.
