¹ Bruker AXS – 5465 East Cheryl Pkwy – Madison, WI - US

The newly released DIFFRAC.EVA v5 defines a new benchmark for phase analysis by making interpretation of one- and two-dimensional XRD data easier, faster, and more accurate than ever. New innovative features include, search/match redesign, support for BRAGG2D, new peak fitting options, and SQUALL (semi-quantitative full pattern matching). Worked examples of some of these new features will be demonstrated.
